Experiences

SyntecX

Islamabad

Full-Stack Developer | MERN & MEAN Stack Developer

September 2022 - Present

- Developed user interfaces for web applications using Angular and React.
- Collaborating closely with design and backend development teams to ensure the harmonious integration of frontend and backend components. This synergy results in robust, high-performing applications.
- Built reusable UI components to streamline development and improve code maintainability.
- Integrated third-party libraries and APIs to add functionality to applications.
- Implementing security measures and scalability enhancements to safeguard application integrity and accommodate growing user bases.
- Created responsive designs and optimized user experience across different devices and platforms.
- Debugged and resolved issues with existing codebase to improve performance and user experience.
- Successfully delivered numerous projects, including high-profile engagements with DFPO, Ufone, and PTI (Rabta App), PTCL (Prism), Quwat. My expertise in Angular, React, and backend technologies has consistently played a pivotal role in delivering top-tier user interfaces.

Systems Limited

Islamabad

Dynamic Commerce Frontend Developer

December 2021 - June 2022

- Worked with Frontend Development team of Microsoft Dynamics Commerce 365.
- Created apps from scratch using Class-based and functional-based components and modified MSD 365 Commerce modules and their functionalities as required in the project or tasks.
- Worked as a shadow resource in the Superga project, assisting the senior React Front End Developer in building and optimizing user interfaces.
- Worked for few weeks with Microsoft F&O to understand data transfer between Backend and Frontend
- Collaborated with the team to ensure seamless integration of front-end and back-end components, contributing to the development of a high-quality e-commerce platform.
- Helped to develop responsive designs and implement best practices for accessibility and usability across different devices and platforms.
- Assisted in the development of reusable components and libraries to streamline development and improve code maintainability.
